+ PROFILE

A Senior Systems Analyst and Full Stack Developer with over 20 years of experience serving clients providing analytical, development and system architectural services. During my career, I have focused on the ever-evolving Oracle suite of ERP platform and modules, having extensive knowledge with interfaces and software design. I have a proven history of successful system implementations which includes managing the conversion of legacy information and providing supporting documentation. Other areas I have supported is in custom development on third party software, in-house audit support as well as development of streamline central processing and retrofits of Oracle ERP systems. I am a high-impact leader with practical experience and skill set. My expertise and passion is to help clients achieve a competitive edge and succeed in the global market.

+ PROFESSIONAL EXPERIENCE

Computer Software Engineer
